

## How to Order

### How to order individual digital downloads, prints and other products

1. Go to the Namyst Photography website or click on the link to the website
2. Select the gallery you wish to view
3. Enter the password (if required)
4. Click on the photo you would like and add it to your shopping cart. (add as many items to your cart as you would like)
5. Once in the shopping cart, click on the edit link next to each photo. Confirm it appears inside the printing "frame" the way you want it
6. Once you're all done, simply checkout to complete your order

### Directions for ordering a Photo Print Package.

My photo print packages differ from the volume sports photography companies where you only get one pose printed different ways. I let **you**, decide what photos you want.

1. Go to the Namyst Photography website or click on the link to the website
2. Select the gallery you wish to view
3. Enter the password (if required)
4. Click on the select photos button in the upper right part of the screen
5. Hover over the photo you would like to select, click on the black circle in the lower right corner which will place a check mark in the circle. This will add it to the group of photos you can use to make your own custom package.
6. Hover over the "Buy" button and click on "Select product for # photos".
7. Select the package you want
8. Drag and drop the photos to the product you would like
9. Add them to your cart
10. Once in the shopping cart, click on the "edit" link next to each photo and confirm it appears inside the printing "frame" the way you want it
11. Once you're all done, simply checkout to complete your order

Don't forget to add some digital downloads so you can post them on social media, email to family and friends, or print later. Digital downloads are delivered via an e-mail link where you can download a zip file. If you do not receive an email, you may have entered an invalid email address or check your junk or spam email folder. Once you receive the download e-mail, click on the download button, and save the file to your computer.

All product orders are shipped directly to you from my partnered professional printing lab.
